LIQUEEL® PT

SOFT SILICONE POLYURETHANE FOAM WOUND DRESSING

LIQUEEL® PT is particularly suitable for the treatment of flat, convex or concave wounds. Special body sites and shapes, such as heel wounds, wounds of the female breast or elbows, can be treated easily and without problems with LIQUEEL® PT. LIQUEEL® PT, like many other dressings, can also be applied to flat and level wounds.

THREE GEOMETRIES

LIQUEEL® is the innovation in the care of weakly to moderately exuding wounds, can be flexibly adjusted from 56 mm to 220 mm without tools and is suitable for the wound care of flat, convex and concave body sites.

LIQUEEL® is unique, both in design and handling, and combines many individual wound dressing sizes and special shapes in a single wound dressing.

Due to its individual and tool-free adaptability, especially to challenging wound locations, LIQUEEL® is a true multitalent.

Ulcus cruris on the lower leg

ULCUS CRURIS LOWER LEG

A typical wound on the lower leg, such as ULCUS CRURIS, can be treated with LIQUEEL® PT without having to cut out individual foam segments.

The exemplary illustrations show that LIQUEEL® PT can be applied very flexibly to flat, concave and convex body sites.

Ulcer - covered with LIQUEEL® PT

LIQUEEL® PT

SOFT SILICONE POLYURETHANE FOAM WOUND DRESSING

Example of flexible application and optimal positioning on concave or convex body sites. LIQUEEL® PT can also be applied to all other typical sites of chronic wounds.

The logo for LF MED, featuring the letters 'LF' in a bold, sans-serif font, followed by a stylized circular symbol containing a horizontal line, and the word 'MED' in a similar bold, sans-serif font.

LF MED

A dynamic splash of pink liquid with numerous bubbles, set against a background of white wavy lines. The splash is centered horizontally and occupies the lower half of the page.
